- Evacuation
- Filling and closing machines
- Labelling, vacuum packaging
- Pneumatic conveying

ENVIRONMENTAL ENGINEERING

- Automotive fluid pumping
- Filtering
- Sewage pumping
- Solvent recovery
- Vacuum priming

FOOD AND BEVERAGE INDUSTRY

- Cutter, filling or tumbler machines
- Freeze drying
- Lyophilisation
- Poultry processing
- Vacuum packaging, mixing

CHEMICAL AND PHARMACEUTICAL INDUSTRIES

- Degasing
- Distillation
- Drying and freeze drying
- Packaging

WOOD INDUSTRY

- Coating, bonding
- Holding and lifting
- Impregnation

MIL'S : made in

MIL'S is designing, developing and producing vacuum pumps and blowers.

Our vacuum systems have already been installed in hundreds of sites all over the world for industrial applications as well as in the Healthcare sector.

Our technologies (lubricated rotary vane pumps, oilless vacuum pumps, blowers, roots) allow us to answer to any requirement of vacuum solutions for Industry or Healthcare.

Specifications are subject to be changed without notice.

France since 1926.

100 persons are employed on two production sites in the region of LYON and in a sales office in the region of Paris. MIL'S operates over 15000 sq.m of manufacturing floor space.

MIL'S is ISO 9001, ISO 14001 and ISO 13485 certified and answers to all quality criterias of a modern producer.

PLASTIC AND COMPOSITE INDUSTRIES

- Degasing
- Pneumatic conveying
- Resin transfer
- Vacuum bagging

GLASS INDUSTRY

- Coating
- Forming

SOLAR AND ENERGY INDUSTRIES

- Coating
- Handling
- Lamination
- Oil degasing
- Power engineering

HEALTHCARE

- Surgery
- Obstetrics
- Anesthesia, resuscitation

GENERAL PURPOSE

- Central vacuum supply
- Leak detection
- Packaging
- Picking and handling
- Pneumatic conveying

High performance oil-flooded vacuum pumps

New generation of vacuum pumps with fast pumping speed due to 6.10^{-2} mbar absolute end vacuum

High flow rate at 1 mbar

Internal design providing a low noise level for an easy integration into industrial machines

Installation near operators

Delivery with MV99S 100% synthetic oil for long life time and heavy duty operating conditions

Lubricated rotary vane vacuum pumps

Oil filter standard on each size of vacuum pump with dual recycling oil circuit

Accessible & adjustable gas ballast following customer process with high capacities of water pumping

Possible customisation of the protection cover

Options:

- Oil level switch
- PT100 temperature sensor
- Many other options available

EVISA E25.2 HV

The lubricated rotary vane pumps EVISA are designed to be used in a wide range of industrial and healthcare applications.

They can run continuously from atmospheric pressure to ultimate vacuum.

They are silent and extremely robust.

- Single stage vacuum pump
- Continuous operation from atmospheric pressure to end vacuum : $5 \cdot 10^{-1}$ mbar
- High pumping speed even at low pressure
- Integrated oil mist filter on the exhaust

Lubricated rotary vane vacuum pumps

Pumping speed on 1000 l vessel

Performance curves

EVISA E40.R

The lubricated rotary vane pumps EVISA are designed to be used in a wide range of industrial and healthcare applications.

They can run continuously from atmospheric pressure to ultimate vacuum.

They are silent and extremely robust.

- Single stage vacuum pump with the end vacuum of $6 \cdot 10^{-2}$ mbar
- Compactness and noise level optimized for an easy integration in machines
- High water vapor pumping capacity with finely adjustable gas ballast
- Designed for light onsite maintenance without piping disconnection
- Integrated oil mist filter on the exhaust

EVISA E150.R

The lubricated rotary vane pumps EVISA are designed to be used in a wide range of industrial and healthcare applications.

They can run continuously from atmospheric pressure to ultimate vacuum.

They are silent and extremely robust.

- Single stage vacuum pump
- Continuous operation from atmospheric pressure to end vacuum : 8.10^{-2} mbar
- High pumping speed even at low pressure
- Integrated oil mist filter on the exhaust
- IE3 motor

Lubricated rotary vane vacuum pumps

Pumping speed on 1000 l vessel

Performance curves

— 60 Hz - without gas ballast
— 50 Hz - without gas ballast

- - 60 Hz - with opened gas ballast
- - 50 Hz - with opened gas ballast

EVISA E350.R

The lubricated rotary vane pumps EVISA are designed to be used in a wide range of industrial and healthcare applications.

They can run continuously from atmospheric pressure to ultimate vacuum.

They are silent and extremely robust.

- Single stage vacuum pump
- Continuous operation from atmospheric pressure to end vacuum : 1.10^{-1} mbar
- High pumping speed even at low pressure
- Integrated oil mist filter on the exhaust
- IE3 motor

Lubricated rotary vane vacuum pumps

Pumping speed on 1000 l vessel

Performance curves

EVISA E600.R

The lubricated rotary vane pumps EVISA are designed to be used in a wide range of industrial and healthcare applications.

They can run continuously from atmospheric pressure to ultimate vacuum.

They are silent and extremely robust.

- Single stage vacuum pump
- Continuous operation from atmospheric pressure to end vacuum : 1.10^{-1} mbar
- High pumping speed even at low pressure
- Integrated oil mist filter on the exhaust
- IE3 motor

EVISA ATEX lubricated vane pumps are designed for a wide range of applications in potentially explosive atmospheres. Depending on the model, they can be installed in gas or dust zone.

They can run continuously from atmospheric pressure to ultimate vacuum.

They are silent and extremely robust.

- Single stage vacuum pump with an end vacuum of 6.10^{-2} mbar
- Compactness and noise level optimized for an easy integration in machines
- High water vapor pumping capacity with finely adjustable gas ballast
- Integrated oil mist filter on the exhaust
- Standard temperature safety control by intrinsically safe PT100
